

ISLIP 92

Proceedings

5th International Symposium on Lucid and Intensional Programming

IEEE Computer Society 1992 International Conference on
COMPUTER LANGUAGES
April 20-23, 1992 • San Francisco, California, USA

Sponsored by the IEEE Computer Society
Technical Committee on Computer Languages
In cooperation with ACM SIGPLAN & IFIP Working Group 2.4

Forward from ISLIP 92 Committee

This year ISLIP (International Symposium on Lucid and Intensional Programming) is being held as part of and on the first day of the 1992 International Conference on Computer Languages. We hope that our participation in ICCL 92 will expose those attending the conference to the concepts of Intensional Programming.

ISLIP 92 is the fifth in the ISLIP series. Previous ISLIP's have been held over a two-day period, which gave ample time for presentation and discussion. This year ISLIP is held in one day, which limits the number of papers to be presented. We have invited E.A. Ashcroft, David Israel, and Bill Wadge to contribute papers. All other papers were submitted.

We hope that you enjoy the ISLIP *Proceedings* and we look forward to your participation in the future.

Tony Faustini
for the ISLIP 92 Committee

ISLIP 92 Committee

Edward Ashcroft	Arizona State University
A. Faustini	Arizona State University
W. Wadge	University of Victoria, Canada
S. Matthews	University of Warwick, UK

Table of Contents

<i>The Lucid Language: Past, Present, and Future</i>	1.
Ed Ashcroft Department of Computer Science Arizona State University	
<i>Preliminary Performance of a Parallel GLU Implementation on a Network of Workstations</i>	16.
R. Jagannathan and C. Dodd Computer Science Laboratory SRI International, Menlo Park, CA 94025	
<i>The Distributed Dataflow Language vLucid</i>	26.
W.H. Mitchell Microsoft Corporation A. Faustini Arizona State University	
<i>Monads and Intensionality</i>	43.
Bill Wadge Department of Computer Science University of Victoria, Canada	
<i>ML - Lucid, an Intensional Functional Language</i>	54.
John A. Plaice Department of Computer Science University of Ottawa, Canada	
<i>Lucid and Intensional Logic</i>	63.
David Israel AI Laboratory SRI International, Menlo Park, CA 94025	
<i>Dyadic Logic: Austere, Intensional, Predicae Calculus</i>	81
M. S. Lanus and E. A. Ashcroft Department of Computer Science Arizona State University
